ABOUT ME

I'm a cybersecurity enthusiast and frontend developer who approaches technology from both sides of the fence. My journey started with curiosity — what happens when I push a system past its limits? Now I build scripts that probe, study vulnerabilities others overlook, and design fast, interactive web experiences using React, Tailwind, and Vite. Comfortable navigating Kali Linux, running recon with Nmap and OSINT frameworks, and shipping production-ready apps from hackathon prototypes. My goal: think like an attacker, act like a defender, and document everything for the community.

PROJECTS

Revvyy

[STABLE] revvy-iota.vercel.app

AI-powered automated code review and security auditing cockpit.

- Built React/TypeScript frontend with real-time review dashboard and heatmap visualisations.
- Integrated Groq LLM via FastAPI backend (by teammate Smit) for instant code analysis.
- Supports multi-file uploads, severity tagging, and exportable audit reports.

[React] [TypeScript] [Tailwind CSS] [FastAPI] [Groq AI] [Vite]

CampusRent

[ACTIVE] GitHub Repository

Peer-to-peer rental marketplace for campus communities.

- Full-stack app with React + Vite frontend and Node.js/Express + Socket.io backend.
- Implemented reverse-auction pricing model and real-time chat between renters and owners.
- Deployed on Vercel (frontend) and Render (backend); debugged cross-origin connectivity.

[React] [Vite] [Node.js] [Socket.io] [Tailwind CSS] [Render]

HyperFocus

[ACTIVE] Vercel

Cyberpunk-themed Pomodoro timer and productivity manager.

- Triple-ring animated timer with Spotify integration for focus music.
- Streak tracking, session history, and ambient soundscapes — pure vanilla HTML/CSS/JS.

[HTML] [CSS] [JavaScript] [Spotify API]

GeoVault

[STABLE] geovault.netlify.app

Fictional sci-fi country-buying marketplace with a Three.js/WebGL 3D interactive globe.

- 3D globe with orbit controls, country selection, and animated purchase flows.
- Pure HTML/CSS/JS — no frameworks; custom WebGL shaders for atmosphere glow.

[Three.js] [WebGL] [HTML] [CSS] [JavaScript]

PickMySpot

[LIVE] pickmyspot.netlify.app

Real-time smart seat booking and allocation system.

- Web app + Android APK for seat reservation with live availability updates.
- Co-built with Jaydeepsinh Jadeja; includes admin panel for slot management.

[React] [Node.js] [Android] [Real-time]

BinRoute

[STABLE] Vercel

AI-powered smart municipal waste management dashboard and fleet optimizer.

- Next.js frontend with dual light/dark theme; mock data for 50 Mumbai bins.
- Node.js/Express backend with Supabase for bin status tracking and route optimisation.

[Next.js] [Node.js] [Supabase] [Express] [Tailwind CSS]

RootLock

[TOOL]

rootlock.netlify.app

Cyberpunk-themed password strength analyser with entropy-based scoring.

•

Calculates real entropy, detects common patterns, and gives actionable hardening tips.

•

Fully client-side — no data leaves the browser.

[HTML]

[CSS]

[JavaScript]

[Cryptography]

KaliCMD

[TOOL]

Vercel

A–Z offline reference directory for 256 Kali Linux commands.

•

Live search, clipboard copy, category filters, and a full terminal aesthetic.

•

Standalone single-file HTML tool — works offline with zero dependencies.

[HTML]

[CSS]

[JavaScript]

[Kali Linux]

DigiLocker Tampering Detector

[HACKATHON]

Hackathon

AI forensic analysis tool for detecting tampering in government documents.

•

React frontend for document upload and forensic report display.

•

Flask backend (teammate) for ML-based metadata and pixel-level anomaly detection.

[React]

[Flask]

[AI/ML]

[Document Forensics]

TECHNICAL SKILLS

Cybersecurity	Penetration Testing · Ethical Hacking · Kali Linux · Nmap & Recon · OSINT · Burp Suite · Metasploit (basics) · Wireshark · Social Engineering Awareness · Offensive Security · Defensive Security · Vulnerability Assessment · Network Security · Web App Security · OWASP Top 10 · TryHackMe · Hack The Box · Linux CLI
Frontend Dev	React · TypeScript · JavaScript · HTML · CSS · Tailwind CSS · Vite · Framer Motion · Responsive Design · Figma · Canva · Graphic Design
Backend & Tools	Node.js · Express · FastAPI · Flask · Next.js · Socket.io · Supabase · Git & GitHub
Languages	Python · Python Automation · Bash Scripting · JavaScript · TypeScript
Other	Three.js · WebGL · Android Development · Arduino · Security Tool Building

NON-TECHNICAL SKILLS

[Communication] [Teamwork] [Problem-Solving] [Critical Thinking] [Time Management] [Adaptability] [Learning Mindset] [Leadership] [Emotional Intelligence] [Decision-Making]

EDUCATION

Bachelor of Engineering — Computer Science

2022 – Present

Gujarat, India

ACTIVITIES & ACHIEVEMENTS

- Applied for Chief Coordinator role at college TEDx event — demonstrating leadership beyond technical work.
- Attended TEDx event as audience member, engaging with speakers on innovation and technology.
- Active hackathon participant — built DigiLocker Tampering Detector and other projects under time pressure.
- Freelancing on Internshala and Fiverr, offering full-stack development (Frontend + Backend duo with Smit).
- Documented 256 Kali Linux commands in a standalone offline tool shared with the security community.
- Platforms: TryHackMe · Hack The Box — actively practising penetration testing labs.

FREELANCE & COLLABORATION

Available for freelance frontend and full-stack projects. Work as a competitive duo with Smit (backend specialist), offering end-to-end delivery — React/Vite/Tailwind frontends paired with FastAPI/Node.js backends. Active on **Internshala** and **Fiverr** (Basic / Standard / Premium tiers). Open to bug bounty collabs, security research, CTF teams, and freelance security consulting.
